

Image Wish List

Photographs, paintings, drawings and sketches of these subjects have been requested for use in a variety of park publications. Artwork with any level of detail will be considered.

1. arctic fox
2. brown bear
3. caribou
4. Dall's sheep
5. golden eagle
6. wood frog
7. Canada goose
8. hare – snowshoe or tundra, summer & winter
9. mosquitoes (body visible)
10. gray jay
11. killer whale
12. loons
 - a. yellow-billed – several angles / more detail, nest & eggs
 - b. common
 - c. Pacific
 - d. arctic
 - e. red-throated
13. muskox
 - a. single, representative animal
 - b. group
 - c. individuals by age class
14. Northern shrike
15. snowy owl
16. polar bear
17. wolverine
18. raven
19. chum salmon
 - a. eggs / redd
 - b. alevin
 - c. fry
 - d. smolt
 - e. adult
 - f. spawners
20. Arctic tern
21. bearded seal
22. vole
23. lemming
24. lynx
25. yellow legs (*Tringa flavipes*)
26. zooplankton
27. dragonflies – Alaska species
 - a. single with some detail
 - b. resting on grass around pond
 - c. in tandem and wheel position
28. tundra bumble bee

29. honey bee
30. woolly bear caterpillar
31. ant – showing 6 legs, 3 body parts, 2 antennae
32. mouth parts of following animals (detailed):
 - a. mosquito
 - b. butterfly
 - c. fly
 - d. ant
33. walrus
34. beaver
35. owls (detailed enough to show distinguishing colors / patterns / shapes / features):
 - a. barn owl
 - b. snowy
 - c. short-eared
 - d. great horned
 - e. great grey
 - f. northern hawk
 - g. boreal
36. ATV driving across stream
37. birds / fish / insects eating salmon eggs
38. Northern pike or other large fish eating salmon fry
39. ducks eating young salmon
40. scene depicting water pollution (oily, trash, etc.)
41. eagle catching fish in river
42. bear catching salmon
43. people fishing for salmon, preferably with nets
44. seals / whales eating adult salmon
45. commercial fishing boat
46. fish caught in trash (like soda can plastic rings)
47. Brant goose
48. California gull
49. osprey
50. peregrine falcon
51. ruby-throated hummingbird
52. western sandpiper
53. whooping crane
54. sandhill crane
55. wood frog
 - a. adult
 - b. mating
 - c. eggs
 - d. tadpoles, no legs
 - e. tadpoles with legs
 - f. froglet (some tail left)
56. brown bear (showing shoulder hump)
57. polar bear
58. black bear (showing profile)
59. blueberries
60. ringed seal
61. landscapes:

- a. tundra
 - b. sea ice
 - c. boreal (spruce)
62. separate scenes that juxtapose the following:
- a. viewing bears up close (bears large in foreground) vs. viewing bears from a distance (bear small, off in distance)
 - b. food in / around tent vs. clean camp, eating food way away from tent
 - c. group making noise to alert bear vs. hiking quietly and surprising bear
 - d. hiking in a group vs. hiking alone
 - e. running from bear vs. standing still, facing bear, making self bigger, “talking” to bear
63. wolves showing postures (outlines are fine):
- a. greeting by sniffing
 - b. play bow
 - c. submissive (ears back, no eye contact, tail down)
 - d. dominant (ears up, fluffed up, tail up)
 - e. intimidated (on back, exposing belly)
 - f. marking territory (i.e., peeing on a rock)
 - g. aggressive (baring teeth)
64. scenes or individuals demonstrating above wolf behaviors (color)
65. wolf howling
66. moose
67. ground squirrel
68. beluga whale
69. ptarmigan
70. caribou – variety, individual images showing following (photos would be great for some of these):
- a. bull, variety – winter, summer, velvet / none, antlers / none, from various angles
 - b. cow, same variety
 - c. bulls fighting
 - d. cow with calf, nursing also
 - e. calf running
 - f. bird’s-eye view of herd migrating
 - g. swimming, crossing river
 - h. detail of hooves
 - i. caribou track vs. moose track
 - j. walking on tundra, snow, climbing, walking along river
 - k. digging crater in snow with hoof
 - l. smelling through snow
 - m. furry nose
 - n. nose down, eating – summer & winter
 - o. caribou foods: lichen, grass, leaves / berries, mushrooms
 - p. walking through snowstorm
 - q. newborn calf
 - r. thousands at calving ground
 - s. being bothered by mosquitoes and flies
 - t. seeking refuge from bugs – up high for a breeze, in water, or on any remaining ice
71. reindeer in corral
72. northern lights – various patterns / shapes
73. pairs of images to juxtapose & show arctic adaptations:
- a. snowshoe hare (short legs & ears) vs. jackrabbit (long legs & ears)
 - b. ground squirrel (short ears, tail) vs. tree squirrel (long ears, bushy tail)

- c. muskox vs. water buffalo
 - d. ptarmigan (feet & legs covered in feathers) vs. quail (bare feet & legs)
 - e. arctic fox (short ears/tail, thick fur) vs. kit fox (long ears/tail, short fur)
 - f. caribou vs. deer (show ears, nose, tail)
 - g. lemming (ears, tail, fur) vs. kangaroo rat (ears, tail, fur)
 - h. lynx (tail, fur) vs. cougar / mountain lion (tail, fur)
 - i. tundra bumble bee (darker colors, fuzzier) vs. desert bumble bee (lighter, less fuzzy)
74. Bird beaks (don't need whole body or great detail, form is most important):
- a. medium length, narrow for eating bugs on trees (like woodpecker)
 - b. long, narrow for birds poking through mud to get bugs (shorebirds)
 - c. for drinking nectar (hummingbird)
 - d. short, wide, strong for cracking seeds
 - e. long, wide for straining food from water
 - f. long, strong for grabbing fish
75. ice age animals:
- a. woolly mammoth
 - b. giant ground sloth
 - c. saber-toothed cat
 - d. giant short-faced bear
 - e. western camel
 - f. saiga antelope
 - g. ice age horse
 - h. steppe bison
 - i. giant beaver
76. map, Beringia / Bering land bridge
77. sea otter
78. tundra swan
79. mallard duck (or other NW Alaska species)
80. vole
81. shrew
82. Alaska blackfish
83. Old World swallowtail caterpillar
84. variety 10 North American animals that are NOT arctic dwellers
85. cottongrass tussock (*Eriophorum vaginatum*)
86. jaegers
87. Old World swallowtail butterfly
88. weasel / ermine
89. carrion beetle
90. willows
91. rodent nest with dead grass in tundra
92. fireweed flowers
93. blueberries
94. salmonberries / cloudberry / akpiqs
95. lowbush cranberries
96. snow
97. wind
98. ice
99. hills
100. soil
101. sun

102. air / oxygen
103. types of gold mining (photos only):
 - a. panning
 - b. tunnel / sluice
 - c. dredge
 - d. water cannon
104. foods that are roots: carrots, potatoes, etc.
105. foods that are stems: celery, asparagus, etc.
106. foods that are leaves: lettuce, cabbage, spinach, etc.
107. foods that are flowers: broccoli, cauliflower, etc.
108. foods that are fruits: apple, orange, etc.
109. foods that are seeds: sunflower seeds, pecans, other nuts, etc.
110. photo of Eskimo potato roots & above-ground plant parts
111. spruce tree trunk with sap / gum
112. sourdock with leaves
113. Animal tracks (black/white sketch):
 - a. moose
 - b. black bear
 - c. brown bear
 - d. polar bear
 - e. caribou
 - f. goose
 - g. Dall's sheep
 - h. showshoe hare
 - i. wolf
 - j. fox
 - k. wolverine
 - l. beaver
 - m. porcupine
114. water cycle illustrations (these can be cartoon-like):
 - a. precipitation – raindrops, etc. falling from cloud
 - b. condensation – clouds building
 - c. evaporation – showing upward movement
 - d. runoff – streams running downhill, etc.
 - e. infiltration – water seeping through ground layers
 - f. transpiration – sunshine / plant with plant giving off water vapor from leaves
115. river
116. ocean
117. lake
118. glacier
119. big city with very bright lights
120. airplane taking off or landing with birds flying near it
121. people bird hunting
122. bird eating trash or drinking from polluted water
123. bird nest with no eggs
124. dog chasing birds from nest (ground nester)
125. birds flying through power lines
126. buildings / development on coastal wetlands
127. birds flying in stormy weather
128. house cat stalking a bird
